

## Mr Fuzzy™

Thank you for purchasing one of my favorite new products, these are the same designs as I use in my custom pedals.

These Modules are used by some of the top guitar players in the world, giving them the extra gain and edge to get their signature sounds.

The Mr Fuzzy™ was designed with the idea of being as transparent as possible, to not overly change the original sound as it comes out of the instrument. I worked for years on such a design, and have developed a circuit that doesn't degrade the original sound, it enhances it with more Clarity and Definition. Mr Fuzzy™ will enhance your great rhythm sound without dropping out all your Low End. Get ready for Chocolatey Luscious Solo's, and endless possibilities.

When bypassed (pressed IN) controls don't work (True Bypass).

Activating Module (Pressed OUT) the Mr Fuzzy™ is on.

Touch Control: (Main Knob) Sets the Input Sensitivity and Level to the First Stage, this allows you to set when you want Mr Fuzzy™ to come alive, in relation to the volume control on your instrument

More Control:

(Top Trim on back): Sets the overall Gain, and works in relation to the Touch Control.

Master Control:

(Bottom Trim on back): Sets the overall Output of Mr Fuzzy™

Power:

The modules can be powered by a single 9 v battery.  
You can power multiple modules on one battery.

**Make Sure you unplug the Instrument after use to preserve battery life.**
