

QuackPot™

Thank you for purchasing one of my favorite new products, these are the same designs as I use in my custom pedals.

These Modules are used by some of the top guitar players in the world, giving them the extra gain and edge to get their signature sounds.

The QuackPot™ was designed with the idea of being as transparent as possible, to not change the original sound as it comes out of the instrument.

The classic 70's funk box now available in a Knob.

Dynamic picking response produces super-funky wha wha like tones.

QuackPot is an Automatic Wha / Envelope Filter that can generate Percussive Punchy filter Wha's for a rhythmic Awesome Groove.

QuackPot™ Operation:

When bypassed (pressed IN) controls don't work (True Bypass).

Activating Module (Pulled OUT) the QuackPot™ knob.

Main Control: Simple one-knob Range Control Responds to your personal style

Internal Trim: Sets the sensitivity of the QuackPot™, hot pickups respond different from low output pickups. Set the trim for the perfect response to your playing style.

Power: The modules can be powered by a single 9 v battery.
You can power multiple modules on one battery.

Make Sure you unplug the Instrument after use to preserve battery life.

A handwritten signature in black ink that reads 'Lee Jackson'.
